About this Contract:

SIN 874-501 Supply and Value Chain Management Services

Services including, but not limited to, the planning, development, management, operation, and maintenance of logistics systems. These systems deal with: acquisition support, movement and maintenance of resources (including the material requirements determination and acquisition planning, storage, movement, distribution, maintenance, evacuation and disposition of material and equipment) asset or property visibility and management; and operation and maintenance of the infrastructures that support these activities. Contractors may provide assistance and guidance in support of an agency's assessment of the best combination of channels to create value for its customers. Services may include vendor-managed inventory systems; the operation of private and/or Government-owned warehouses, stockrooms, or other storage facilities; shipping and receiving; staging and storage; packing and crating (excluding household goods); and design, re-engineering, operation and maintenance of distribution and material handling equipment systems.

* Orders may exceed the GSA Maximum Order Threshold, however GSA must ask for (but are not required to receive) a discount at this level.

SIN 874-502 Acquisition Logistics

Services involving the logistics management discipline which supports a product or system through its life cycle. Services may include Acquisition Logistics or Integrated Logistics Support associated with the design, development, test, production, fielding, sustainment, improvement of, and disposal of cost effective systems including the eventual disposal or salvage of these systems. Contractors may provide logistics expertise in the pre-production or design phase of systems to ensure that the system can be supported through its life-cycle and that the infrastructure elements necessary for operational support are identified and acquired. These services may continue through the life cycle of the system or product and include guidance, assistance and/or operational support. (Note: Engineering services may be acquired under the GSA Professional Engineering Services multiple award schedule.) The supply chain management elements, that are involved in this activity, may be acquired under this SIN or in combination with other SINs.

SIN 874-503 Distribution and Transportation Logistics

Services including, but not limited to moving and storage, transportation system development and management, carrier management and routing, and freight forwarding (excluding household goods and small package services). These services may include planning and design, implementation, or operation of systems or facilities for the movement of goods, supplies, equipment or people by road, air, water, rail, or pipeline. Commercial passenger airline services covered by the Airline City Pair Program are excluded.

SIN 874-504 Deployment Logistics Services

Services including, but not limited to, contingency planning; inventory and property planning, movement, storage, and accountability; and communications and logistics systems to permit rapid deployment and management of supplies and equipment. Contractors may provide expert advice, assistance, guidance, or operational support to identify and utilize existing regional or global resources, identify alternative capabilities, and plan for effective integration of public and private sector support or resources.

SIN 874-505 Logistics Training Services

Services including, but not limited to, training in system operations and automated tools for supply and value chain management, property and inventory management, distribution and transportation management and maintenance of equipment and facilities supporting these activities.

Customization of off-the-shelf training may include but is not limited to:

- workbooks
- computer based training
- overhead transparencies
- training manuals
- videotapes
- advanced presentation media
